14NP0045 - Installation of ground mounted solar photovoltaic array at Ovenstone, Sharperton, Morpeth, Northumberland, NE65 7AT

Dear Michael,

Thank you for consulting me on the above application. From a landscape perspective, the principal public receptor site from which this development might be seen is the B6341 Elsdon to Thropton road. Other receptor sites do include Access Land and public rights of way to the south and east of the application site but views of the proposed development are likely to be limited and gained from a distance. Due to topography, boundary wall features, existing vegetation and buildings at Ovenstone I do not believe that the proposed development would have a significant effect on the Landscape Character or views of this part of the National Park.

I do not believe that any notable trees will be affected and as the application does not involve any new exterior lighting the Dark Sky Park status of the National Park will not be affected.

I have no objections.
