

WINDOWS: Ten box sash windows to be replaced on a like for like basis. Referring to the Grade II Listed, the new windows will be much closer in appearance to the original single-glazed sash window to the centre host building.

DOORS: Four doors designed on a like-for-like replacement - two fully glazed 8 panes per door whilst the other two would be half glazed with a grooved timber panel below mid-rail.

MATERIALS: The windows and doors would be made from high-grade FSC-certified Redwood timber. The Slimline Sash combines the authentic design of a sash window with modern weather-protection and thermally efficient glazing.

1 South Elevation as proposed
1 : 100

2 South Perspective - as proposed
