Subject: RE: Planning Application Consultation 15NP0009 Walltown Quarry Picnic Site, Brampton, Greenhead, Northumberland, CA8 7HZ

Dear Chris,

I have read the information supplied with this application and I have no objections. The application site is approximately 600 m from the Tipalt Burn SSSI and 1200 m from the Allolee to Walltown SSSI. I do not consider it is likely that the proposals would have any effect on the features of interest of either of these sites. The proposals are within the Walltown Quarry and Craggs Local Wildlife Site which is designated for whin sill grassland. These proposals are not likely to affect the vegetation of interest. I have checked a recent survey of important plants within the quarry and neither the borehole or the store are close to significant species. In the area around the proposed store marsh cudweed was identified on the track, but this ruderal species is likely to cope with any disturbance in the area during construction.

There are no likely issues with protected species associated with these proposals.

Yours sincerely,
Gill Thompson
