

Descriptive information submission to Discharge Conditions 7 & 8 for the following

Walltown Planning Application Approval Ref 14NP0080

Condition 7

The existing bat box has been removed by a licensed person and found not to of been used, this is to be re-located on the west facing gable end wall of the building at high level just under the roof coping stone (approximately 2 metres from the entry point previously shown on the bat survey).

As shown on drawing 140040-11 Rev A and 140040-13 Rev A.

Condition 9

Anti flame bird netting will be fixed to the underside of the covered area just above door lintel height, netting size will be 19mm square and made from HDPE Ultra Violet stabilized twine 1mm diameter. Tell tale will be fitted to create a better visual barrier.

A weekly visual inspection will be completed and any repairs will be completed immediately to avoid trapping of birds in damaged netting.

Netting will be totally removed once the opening apertures are fitted with door / window frames and glazing installed.

As shown on drawing 140040-13 Rev A.
