Subject: RE: Planning Application Consultation 15NP0036 Westnewton Bridge, Kirknewton, Wooler,
Northumberland, NE71 6XF

Dear Chris,

15NP0036 - Provision of permanent scour protection to highway bridge. Associated soft engineering works to minimise scour and gravel deposition. Removal of old railway abutment, raising crest of flood embankment to improve risk to flooding to adjoining land at Westnewton Bridge, Kirknewton, Wooler, Northumberland, NE71 6XF

Thank you for consulting me on this application.

I can confirm that I do not believe that the proposed development will have a significant detrimental effect on either the landscape character, views, notable trees, hedgerows or Dark Sky Park status of the National Park. It is possible that with the proposed soft engineering and management of the watercourse that the scaring effect caused by erosion of the river banks will be reduced allowing the bank-side vegetation to become more established there-by having a positive landscape effect in the future.

I therefore do not have any objections to this application.

regards
