Foul drainage assessment form (FDA1)

Nesse need this form should be used for planning related queries only and cannot be used when applying for an environmental permit.

APPLICANT DETAILS
Name JOHN M. MINNOCK.
Address 25 NORWICH CLOSE, ASHINGTON.
NORTHUMBERLAND, NE63 9RY.
Telephone No/e-mail

This form should be used to establish whether non-mains drainage, either a new system or connection to an existing system, would be acceptable. Your answers to the following questions will be taken into consideration. It is important that you provide full and accurate information. Failure to do this may delay the processing of your application.

You must provide evidence that a connection to the public sewer is not feasible. Other than very exceptionally, providing non-mains drainage as part of your Planning or Building Regulation application will not be allowed unless you can prove that a connection to the public sewer is not feasible. Non-mains drainage systems are not considered environmentally acceptable in publicly sewered areas. Please note that the existence of capacity or other operating problems with the public sewer are not valid reasons for non-connection where this is reasonable in other respects.

Where connection to the public sewer is feasible, agreements may need to be obtained either from owners of land over which the drainage will run or the owners of the private drain.

Government guidance contained within DETR Circular 03/99/ WO 10/99 'Planning requirements in respect of the use of non-mains sewerage incorporating septic tanks in new development' gives a hierarchy of drainage options that must be considered and discounted in the following order:

- 1 Connection to the public sewer
- 2 Package sewage treatment plant (which can be offered to the Sewerage Undertaker
- for adoption)

1

- 3 Septic Tank
- 4 If none of the above is feasible a cesspool

You must respond to all the following questions, if you wish to submit additional information please do so, marked clearly "Additional Information". In some cases you will be required to provide a further assessment in accordance with the requirements of DETR Circular 03/99/ WO 10/99 (see Guidance Note 1).

Mains connection	IVES INC
