

## LIQUID-APPLIED ROOFING SOLUTIONS

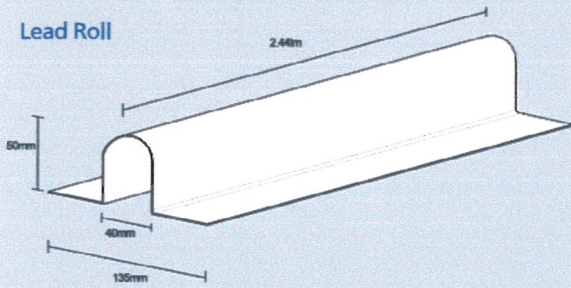

### SIMULATED ZINC FOR A SUSTAINABLE ROOFING PROJECT

The BBA-approved Protec system was used to recreate the look of zinc on this new-build development in Surrey which also incorporated Photovoltaic (PV) cells to help reduce the carbon footprint of the building. The first stage was to install insulation and a plywood deck to which Polyroof GRP Standing Seam trims were fixed. The Protec system was then applied to the whole roof area, encapsulating the standing seam trims and the PV stanchions, to provide a fully seamless and flexible waterproofing membrane that faithfully reproduced the look of zinc at a fraction of the cost.

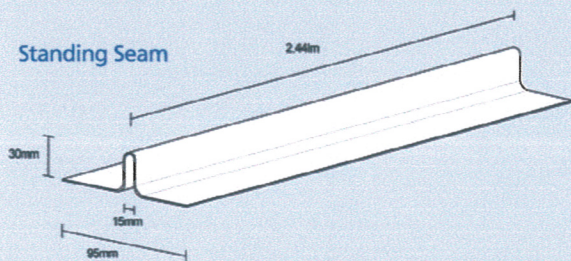

### POLYROOF LEAD ROLL & STANDING SEAM GRP TRIMS

#### Lead Roll

#### Standing Seam

### POLYROOF 185

- For simulated metal finishes
- Suitable for new builds or refurbishment
- Extremely tough and hard-wearing
- Glossy finish
- 20 year insurance-backed guarantee
- BBA approved

Polyroof 185 lead roll finish is widely used to reproduce the look of traditional lead but at lower cost and without the risk of theft. Typical applications include flat roofs, inclined roofs, dormers, porches, canopies and cladding. The system forms an extremely hard wearing and durable membrane and carries BBA approval and a 20 year insurance backed guarantee.

### PROTEC

- For simulated metal finishes
- Suitable for new builds or refurbishment
- Cost-effective system
- Durable and flexible
- Matt finish
- 20 year insurance-backed guarantee
- BBA and FM approved

Protec provides a flexible and durable waterproofing membrane with a flat mat finish, making it the system of choice for many simulated metal applications. Protec is available with a 20 year insurance-backed guarantee and carries BBA and FM approval.

### ELASTEX

- For direct coating of aged metal roofs
- Highly flexible and long-lasting waterproofing
- Matt finish
- Guarantees from 10 to 25 years
- BBA approved

Elastex is a highly flexible polyurethane overlay system ideal for over-coating aged metal roofs. It seals in laps and seams to make the roof completely watertight and eliminates the risk of vandalism or theft of the metal. Elastex forms an excellent bond with metal substrates and can be applied with the minimum of surface preparation. Elastex is approved by the BBA and flexible guarantees of up to 25 years are available dependent on substrate condition.

*It is recommended that you request a sample of the simulated metal finish from your approved contractor to find the right colour and system to ensure the desired finish is achieved*

- INSTALLED BY APPROVED CONTRACTORS
- TOUGH SEAMLESS MEMBRANE
- BBA APPROVED SYSTEMS
