European Guidelines on Fire Safety at Campsites

- Please leave at least 3mtrs between tents/caravan/motor homes

- Cooking appliances and field kitchens should not be fuelled unless the burner is put out and cold. If not, the bottle might catch fire and cause heavy injuries.
- Grills, cooking appliances and similar must not be placed nearer than 1 meter to tent canvas.
- All flexible tubes and couplings to the gas burner should be checked for leakage and that it is in good order
- All inhabitants should be aware of the location of the fire fighting equipments location and how the fire could be detected, and how the alarm should be raised.
- The area between tents should be kept clean and orderly and not be subject to storage of any objects.
