

The Winston

Heritage sliding sash window

The design and specification for this product was born out of a large Grade II listed project that we completed in Winston Churchill's wartime residence on the edge of Richmond Park.

This product was designed to incorporate a number of highly traditional features to give a very traditional aesthetic, but by utilising modern design and materials, we have also been able to deliver exceptional performance. This product comes with our full 10-year guarantee on all elements and delivers energy efficiency ratings as good as our modern double glazed products.

- Manufactured from Accoya, the best longevity of any timber together with exceptional energy efficiency.
- Pilkington Spacia vacuum cavity glazing, delivering U-values comparable with modern double glazing, but with a total thickness of only 6.4mm. No double reflection makes it perfect for use in conservation areas.
- Fully concealed gaskets.
- Traditional fitch fasteners, pulleys and sash limiters in a range of styles and finishes. Hung on traditional lead weights as standard.

- Slender 18mm glazing bars and thin profile of the windows reduce the perceived width of the sections. External bar designed to replicate the traditional appearance of putty pointing.
- Glazed and spray finished exactly as our other products, with all the benefits of performance and longevity. This product comes with our full 10-year guarantee and is eligible for TimbaCare.

Heritage sliding sash

A real alternative to slim double glazing:

- 1 Extended comprehensive guarantees
- 2 Energy efficiency that meets modern regulations
- 3 Traditional appearance for conservation projects
- 4 More cost effective initially and in ongoing maintenance
