## 5. Description of the Proposal

Please describe details of the proposed development or works including any change of use.

If you are applying for Technical Details Consent on a site that has been granted Permission In Principle, please include the relevant details in the description below.

The design is for a fairytale rustic hut, similar in aesthetic to Holly and Rowan hut but raised off the ground on stilts and accessed by a spiral stair and ramp. The hut has been designed to touch the ground lightly and will probably be founded on screw piles further minimising the need for concrete. The landscape will flow beneath the hut. When the useful life of the hut is over it will be possible to remove it without a trace being left. The treehouse will be constructed out of a sustainably sourced timber, reclaimed timber and other sustainable materials. It will be highly insulated (with sheeps' wool and recycled plastic insulation) and airtight following very low energy principles. Cedar shingles will be used for the roof, walls will be clad in larch and oak. The wood will be sourced to look like and blend in with the earthy colours of the surrounding trees, vegetation etc. Windows and doors will be timber framed and high performance

The treehouse will contain a large bed, and two small twin beds, a small kitchen a woodburning stove and a table and chairs. There will be a small bathroom. The main roof will be pitched and covered with cedar shingles which will blend into the surrounding landscape. The structure of the treehouse will be timber and will sit on four posts which will come down to the ground and sit on screw piles to minimise concrete use. Local craftsman will be used wherever possible and materials will be sourced locally wherever possible, apprenticeships if possible.

Parking and access to the hut will be the same minimal approach to the existing huts.
