Dear Colin,

I have no objections to this application if the mitigation shown in the bat and barn owl report is made a condition including timing, the access and the additional owl box. I note that the bat provision is shown on the proposed plans and also a note regarding the top door to be fixed open to allow owl access. This would be acceptable, but another option would be to have a closed door with a smaller access hole in it (with the dimensions given in the report). The design and access statement also references the report and the mitigation which is good so I feel it has been incorporated into the design.

If you have any queries please get back to me.

Yours sincerely,
Gill Thompson
