---

Thanks Liam –

I will make the arrangements to get it withdrawn.

Regards,

Colin

Hi Colin

I have got a structural engineer but I do not think he will be able to do it in time, so it is probably best to withdraw and resubmit.

I hope this is ok?

Many thanks

Liam

Hi Liam –

Just following on from my e-mail below, I am checking whether have you made a decision on how you want to proceed? If you are able to get the structural survey / sectional details to me by the end of next week then there probably would be time to deal with it under the current application. If there is likely to be a delay beyond this then I would suggest withdrawing and resubmitting once all relevant details are available.

I look forward to hearing from you.

Thanks,

Colin

Hi Liam,

Thanks for the e-mail.

It was really useful to meet and have an opportunity to discuss the rationale behind the

proposals.

I think that withdrawing the application and then resubmitting once all the relevant information is collected would be the best way to proceed – if you are happy with this let me know and I will make the arrangements.

Thanks,

Colin

Colin,

Thanks for coming up to Highgreen today, it was very good to be able to talk through the issues. Do you think it is best to withdraw the application and then rebit with structural survey and proposals?

Many thanks

Liam
