Dear Colin,

Further to our discussions at the pre-application stage I do not have any objections to this application as it does not seem to have changed in extent since then. I did not consider that a bat survey was required prior to submitting the application. The proposed extension will be lower than the roof line and knocking through only at a door level. Although there is a chimney present it seems it is not currently used and other flues are in use in the building. Since they have already cleared the vegetation at the rear of the property it did not seem worthwhile asking for an ecological survey of this ground.

I have no further comments.

Yours sincerely,
Gill Thompson
