Date: 19 January 2021 16:43:32

Dear Colin,

As we discussed at the pre-application stage I do not think that a bat survey is necessary for the demolition of this outbuilding. It is not joined to the main house, is built of rendered breeze blocks with no cavities and has an asbestos/composite sheet roof on top with gaps. There is low risk of bats being present and affected by the works. I therefore have no objections to this application.

Yours sincerely,
Gill Thompson
